

CHILDREN

AS

PHOTOGRAPHERS

In Educational Settings – Why It's A Good Idea

www.penandlens.com.au

NOT JUST FOR ADULTS

Photography isn't just for grown-ups. It is a wonderful outlet for children to express their emotions and creativity. By trusting them with a camera, children gain a sense of empowerment and the experience helps them understand technology while igniting their creative thinking.

THROUGH THEIR EYES

As children learn to use a camera, parents and educators gain insights into how kids view their surroundings and the world. Children's photography can be used as an assessment tool to understand individual perspectives and what matters most to each child.

MEMORIES AND MILESTONES

The photos children take become cherished memories for them in the future. Looking back at their pictures, they feel a sense of accomplishment and take pride in preserving their experiences.

NURTURING SKILLS

Photography isn't just about clicking pictures, it enhances fine motor skills as kids learn to handle cameras. As they grow, they delve into the technical aspects of photography, developing their problem-solving skills.

BONDING EXPERIENCE

Photography can be a bonding experience for parents and children. Through this art form, kids learn to experiment and see the world in unique ways. It encourages them to find beauty in everyday surroundings and fosters a deeper appreciation of memories and fleeting moments.

BEYOND THE LENS

The practice of photography stimulates development,
nurtures aesthetic sensibilities,
and sparks innovation.

As children grow, they carry this attentiveness to aesthetics
and design, deepening the parent-child connection.

CAPTURING LIFE STORIES

They say "pictures speak louder than words" and for young children, photography offers a whole new way to communicate with their parents. Sharing photos becomes a heart-felt expression, deepening the parent-child connection.

ENRICHES LEARNING JOURNEY

Incorporating photography into children's lives enriches their journey of learning and growing. It opens up a new realm of creativity, memory-making, and self expression. So, let's hand over the camera and watch as their world transforms into a canvas of captivating moments and cherished memories

PEN AND LENS

Alison's photography style is dedicated to seizing authentic moments and genuine interactions. When you engage Pen and Lens, you secure the unique spirit of your centre, allowing parents, staff, and potential clients to feel its heartbeat through candid and heartfelt imagery.
